

What is the Behavioral Health Community Partner Program?

- A Behavioral Health Community Partner (BH CP) program is intended to provide care management and coordination to qualifying MassHealth members. The Coordinated Care Network (CCN) is a BH CP program and can provide support to certain members with significant behavioral health needs including; serious mental illness and substance use disorders.
- CCN coordinates care with the Enrollee’s behavioral health and medical providers to ensure everyone has the most up to date information on the persons served including: medical and behavioral health diagnosis as well as medication changes. CCN can also advocate with the health insurance provider

How can CCN help your person served?

A care team, which includes: Clinical Care Managers, Care coordinators and Nurses, will:

- Assist with organizing medical and behavioral health appointments.
- Make referrals for substance use disorder services; specialty programs; in home supports such as visiting nurse for medication management or wound care; home health aides; homemaking services; personal care assistance; and transportation resources including PT1s.
- Notify you of events such as hospitalizations, emergency room visits and/or long term placement.
- Assist and participate in discharge planning if admitted to hospital or emergency department to support bridging any gaps that may be encountered.
- Getting resources to help with food, finances, safety, health and nutrition.
- Each Enrollee is assigned a nurse who will follow their care through medication verification and reconciliation after discharges along with offering health and wellness coaching to assist with managing chronic health conditions.

Will the person served qualify? (Must meet all criteria indicated with check boxes)

- 18-64 years old; and;**
- One of the following diagnoses:** Substance use disorder, bipolar, schizophrenia, mood disorder, psychosis, history of suicidal/homicidal, depression, adjustment reaction, anxiety, psychosomatic, or PTSD, **and;**
